Top-Features:

- Hi-fi tuner, ideal for upgrading existing hi-fi systems. Enables reception of modern digital radio stations and adds smart functions such as Bluetooth streaming and USB playback to your system.
- Music playback via Bluetooth 5.3, USB and UPnP: Supports wireless audio streaming via Bluetooth 5.3, the playback of music files directly from a USB stick and the playback of media content via UPnP (Universal Plug and Play).
- Bluetooth transmit and receive function: Can be used as a Bluetooth receiver for external devices or as a transmitter for wireless speakers or headphones.
- Recording function to USB memory: Enables direct recording of radio programmes or music to a connected USB memory device.
- Hi-fi component in an elegant metal housing: Suitable for conventional hi-fi stereo systems, the device fits seamlessly into existing hi-fi racks and systems thanks to its standardised width of 43 cm.
