**Reception technology at the highest level**

## **Willkommen bei TELESTAR**

The TELESTAR brand has stood for quality, innovation and reliability in the field of TV reception technology and digital radios for over 30 years. As an experienced company, we offer our customers an extensive portfolio of modern, high-performance products for the reception and transmission of digital content. Our range includes high-quality products that impress with the latest technology and user-friendly design. We attach particular importance to the precise workmanship and durability of our products in order to meet the high demands of our customers. Thanks to our many years of expertise and our passion for technology, we are able to develop innovative products that meet the constantly growing demands of the market. Customer satisfaction always takes centre stage - from the initial consultation to reliable support.

*Managing Director Frank Kirwel*

TELESTAR is your competent partner for first-class TV reception technology and digital radios. Discover our solutions and experience the latest technology for a digital home.

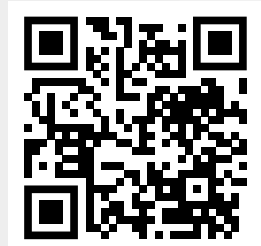

**TELESTAR - Technology for the world of today and tomorrow.**

**More transmitters, clearer sound and maximum comfort**

## **This is digital radio with DAB+**

DAB+ stands for modern radio reception in the best quality and is gradually replacing classic FM. Discover the wide range of stations, enjoy interference-free sound and benefit from additional services.

You can find everything you need to know about DAB+ on the official homepage **[www.dabplus.de](http://www.dabplus.de)**

## Innovative functions for the ultimate listening experience

Many of our radios have a variety of innovative and practical additional functions that take the listening experience to a new level. In addition to first-class DAB+ and FM reception, they offer modern features such as Bluetooth streaming for wireless music enjoyment, integrated Internet radio for access to thousands of stations worldwide and USB interfaces for playing your own music files.

Many models are also equipped with convenient alarm and timer functions, support streaming to and from other devices or can be conveniently controlled via a smartphone app.

Whether for daily music enjoyment at home, in the office or on the go - the versatile radios from TELESTAR leave nothing to be desired.

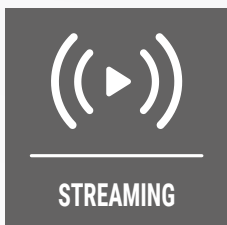

### Digitalradio with DAB+

DAB+ offers crystal-clear reception and a large selection of radio stations with excellent sound quality. The modern technology enables interference-free sound and access to a wide range of programmes that go beyond traditional radio stations.

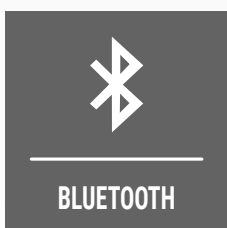

### Worldwide variety in top quality

Internet radio allows you to listen to radio stations over the Internet, regardless of your geographical location. It offers an almost limitless selection of stations from all over the world and a wide range of music and programmes. Reception is in high quality.

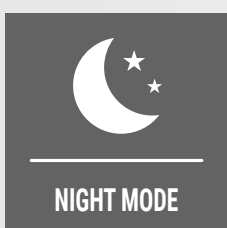

### Integrated streaming services

Integrated streaming services such as Deezer, TIDAL, Qobuz and more enable direct music enjoyment in high quality. This means you can enjoy your favourite music in the best sound quality - without any additional devices.

### Wireless audio streaming

Support for wireless audio streaming via Bluetooth. Music, podcasts or radio stations can be streamed directly from your smartphone or other devices - without any cables and in high sound quality.

### Night mode for undisturbed sleep

Night mode switches the display off and on again automatically - according to individual settings. This prevents annoying lighting at night and ensures undisturbed sleep.

**USB RECORD**

## Record your favourite channels directly

The USB recording function allows you to record radio stations directly onto a USB stick. Favourite stations can be recorded at any time and enjoyed flexibly - without an internet connection and available at any time.

**COMPACT DISC**

## CD player for unlimited music enjoyment

The integrated CD player allows music to be played directly from CDs - without the need for an additional device. Simply insert and enjoy, anytime and anywhere, with excellent sound quality for a perfect listening experience.

**APP CONTROL**

## Convenient app control

Most devices can be conveniently controlled via an app. Change channels, adjust the volume or make settings - all directly from your smartphone. This gives you full control over your listening experience at all times, without having to go to the device.

**ALARM CLOCK**

## Radio alarm clock according to individual schedule

The radio serves as an alarm clock - with programmable wake-up times, snooze function and the choice between DAB+, Internet radio or FM. Perfect for everyday life or the weekend!

**WARNING SIGNAL**

## ASA/EMF plus and emergency warning system

The ASA/EMF warning system ensures fast, barrier-free alerting via DAB+. Radios switch on automatically and send targeted warning messages in affected areas - for reliable information in an emergency.

# TELESTAR®

## DAB+ Radios

More transmitters, more sound, more fun!

## DAB+/Bluetooth adapter for the best sound in the car

The TOP CAR 1 adapter brings first-class DAB+ radio reception and Bluetooth streaming into the car - without any complex conversions. Crystal-clear digital sound can be enjoyed and up to 60 favourite stations can be stored. Thanks to the FM transmitter or line-out, the DAB/DAB+ signal can be easily transmitted to the audio system. Bluetooth 5.0 enables wireless music streaming and hands-free phone calls - the adapter automatically switches to hands-free mode when calls are made. Simple installation using a suction cup and self-adhesive cable clips makes the TOP CAR 1 the ideal solution for modern radio and streaming enjoyment on the move.

- DAB+ car radio adapter with RDS
- Upgrade with DAB+ and Bluetooth
- Including hands-free system
- Simple installation

## TOP CAR 1

### Performance features

- DAB+ car radio adapter with DLS
- 2.3" LCD display
- Wireless transmission to the car stereo system via FM transmitter or line-out output
- Bluetooth 5.0 for hands-free system and music reception from smartphone
- Automatic search of available DAB+ stations
- Automatic switch from music playback to hands-free mode when a call comes in
- Up to 60 favourite stations can be set
- Micro SD card slot (max. 64 GB)
- Supported music formats MP 3/WMA
- 11 languages selectable
- Active DAB+ foil antenna for best possible reception

### Connections

- 1x antenna input (SMB)
- 1x audio output (3.5 mm jack)
- 1x power input (via USB)

### Dimensions / Weight

- 86 x 62 x 28 cm (W/H/D)
- 78 g (net)

### Delivery:

- 1x TELESTAR TOP CAR 1
- 1x Audio cable (3.5 mm jack)
- 1x Cigarette lighter USB charging adapter (2-way)
- 1x Suction holder with swivelling ball joint for the windscreen
- 1x Active antenna (SMB connection) with 8 self-adhesive cable clips
- 1x User manual

## Compact rechargeable digital radio - Ideal for travelling

**TOP 100**

This DAB+ / FM radio offers a wide range of reception options - digital via DAB+ or classic via FM. In addition, Bluetooth 5.4 enables wireless streaming, while USB storage media up to 32 GB provide even more flexibility. The replaceable 1,050 mAh battery can be recharged quickly thanks to the USB-C fast charging function. An illuminated, dimmable LCD matrix display shows station names, tracks or battery status. The integrated 3-watt loudspeaker ensures rich sound, and music can be enjoyed undisturbed via the 3.5 mm headphone connection. Three direct selection buttons allow quick access to favourite stations. With its handy design, this radio is the perfect companion for travelling.

- Compact digital radio
- DAB+ and FM reception
- Music playback via Bluetooth / USB
- Rechargeable battery with quick charge function
- Dimmable LCD matrix display

### Performance features

Compact DAB+ / FM radio
Music playback via Bluetooth 5.4 and USB (max. 32 GB)
Replaceable battery (1,050 mAh, 3.7 V)
Illuminated and dimmable LCD matrix display
Speaker with 3 watts of music power
3 changeable direct dialling buttons
Display with important information such as station name, title or battery level
Headphone connection (3.5 mm jack)
Quick-charging function via USB-C connection
Battery life / playing time: up to 15 hours
Charging time to 75 %: approx. 45 minutes
Charging time to 100 %: approx. 1:30 hours

### Connections

1x USB 2.0
1x Headphone connection
1x Mains connection DC 5 Volt

### Dimensions / Weight

12,8 x 7,2 x 3,2 cm (W/H/D)
217 g (incl. battery)

### Delivery:

TELESTAR TOP 100
1,050 mAh Li-Ion battery
USB-A to USB-C charging cable
User manual

Replaceable battery  
for flexible use

Individually customisable  
direct dialling buttons

## Compact WLAN digital radio with versatile functions

This smart digital radio brings the world of Internet radio stations directly into the living room. Thanks to its space-saving design, it fits perfectly into any environment. Music lovers can enjoy wireless audio streaming via Bluetooth 5.3 or music playback from a USB stick. A flexible Bluetooth send and receive function enables connection to external devices or wireless speakers and headphones. Particularly practical: the customisable night mode automatically switches the display off and on again at set times. A powerful 10-watt loudspeaker ensures a first-class sound experience, and the recording function allows radio programmes to be saved directly to a USB memory device.

- Compact digital radio with WLAN
- Music playback via Bluetooth 5.3 and USB
- Bluetooth transmit and receive function
- Programmable night mode
- Speaker with 10 watts of music power
- Recording function on USB memory

## TOP 200

## Multifunctional digital radio with WLAN, Bluetooth and CD player

## TOP 300

This WLAN radio combines classic and modern entertainment options in an elegant design. In addition to access to thousands of Internet radio stations, it enables wireless music streaming via Bluetooth 5.3 or playback from USB sticks. The integrated CD player also ensures nostalgic music enjoyment of your own collection. The Bluetooth transmit and receive function allows the radio to be flexibly connected to other devices - whether as a receiver or transmitter. The customisable night mode automatically switches the display on and off at certain times. Two powerful 15-watt loudspeakers guarantee excellent sound, while the recording function saves radio programmes directly to a USB memory device.

- Compact digital radio with WLAN
- Music playback via Bluetooth 5.3, USB and CD drive
- Integrated streaming services
- Bluetooth transmit and receive function
- Programmable night mode
- Speakers with 2x 15 watt music output
- Recording function on USB memory

## Modern radio and streaming adapter for existing HiFi systems

This compact smart digital radio adapter has been specially developed to add modern radio and streaming functions to existing hi-fi systems. It does not function as a stand-alone radio, but is connected to an existing music system to enable reception of DAB+, FM and Internet radio as well as wireless streaming via Bluetooth or WLAN. The connection is made either via a 3.5 mm audio cable or an optical cable, allowing flexible integration into various sound systems. This makes it easy to upgrade classic hi-fi systems with the latest digital audio technologies.

- Compact smart digital radio adapter for upgrading hi-fi systems
- 3.2" (8.1 cm) TFT LCD colour display
- Music playback via Bluetooth 5.3, USB and UPnP
- Integrated streaming services
- Bluetooth transmit and receive function
- Programmable night mode
- Recording function on USB memory

## TOP 400

### Performance features

Compact smart digital radio adapter for upgrading hi-fi systems

Integrated streaming services (Deezer, High-ResAudio, Napster, TIDAL, qobuz, Soundmachine and Calm Radio)

## Digital radio adapter with touch operation - Modern streaming for your HiFi system

This smart digital radio adapter not only adds modern radio and streaming functions to hi-fi systems, but also offers particularly convenient and intuitive operation with its 5.5-inch touch display. Unlike many standard models, it is not controlled via buttons, but enables direct, user-friendly interaction via touch. The adapter itself is not a stand-alone radio, but is connected to an existing music system to receive DAB+, FM and Internet radio as well as wireless streaming via Bluetooth or Wi-Fi. Thanks to flexible connection options - via 3.5 mm audio cable or optical cable - the device can be easily integrated into various sound systems. This turns a classic hi-fi system into a versatile, digital audio system in no time at all.

- Compact smart digital radio adapter for upgrading hi-fi systems
- 5.5" (13.7 cm) HD multi-touch display
- Music playback via Bluetooth 5.3, USB and UPnP
- Integrated streaming services
- Bluetooth transmit and receive function
- Programmable night mode
- Recording function on USB memory

## Perfect addition to the HiFi rack - Modern tuner with versatile functions

**TOP 500**

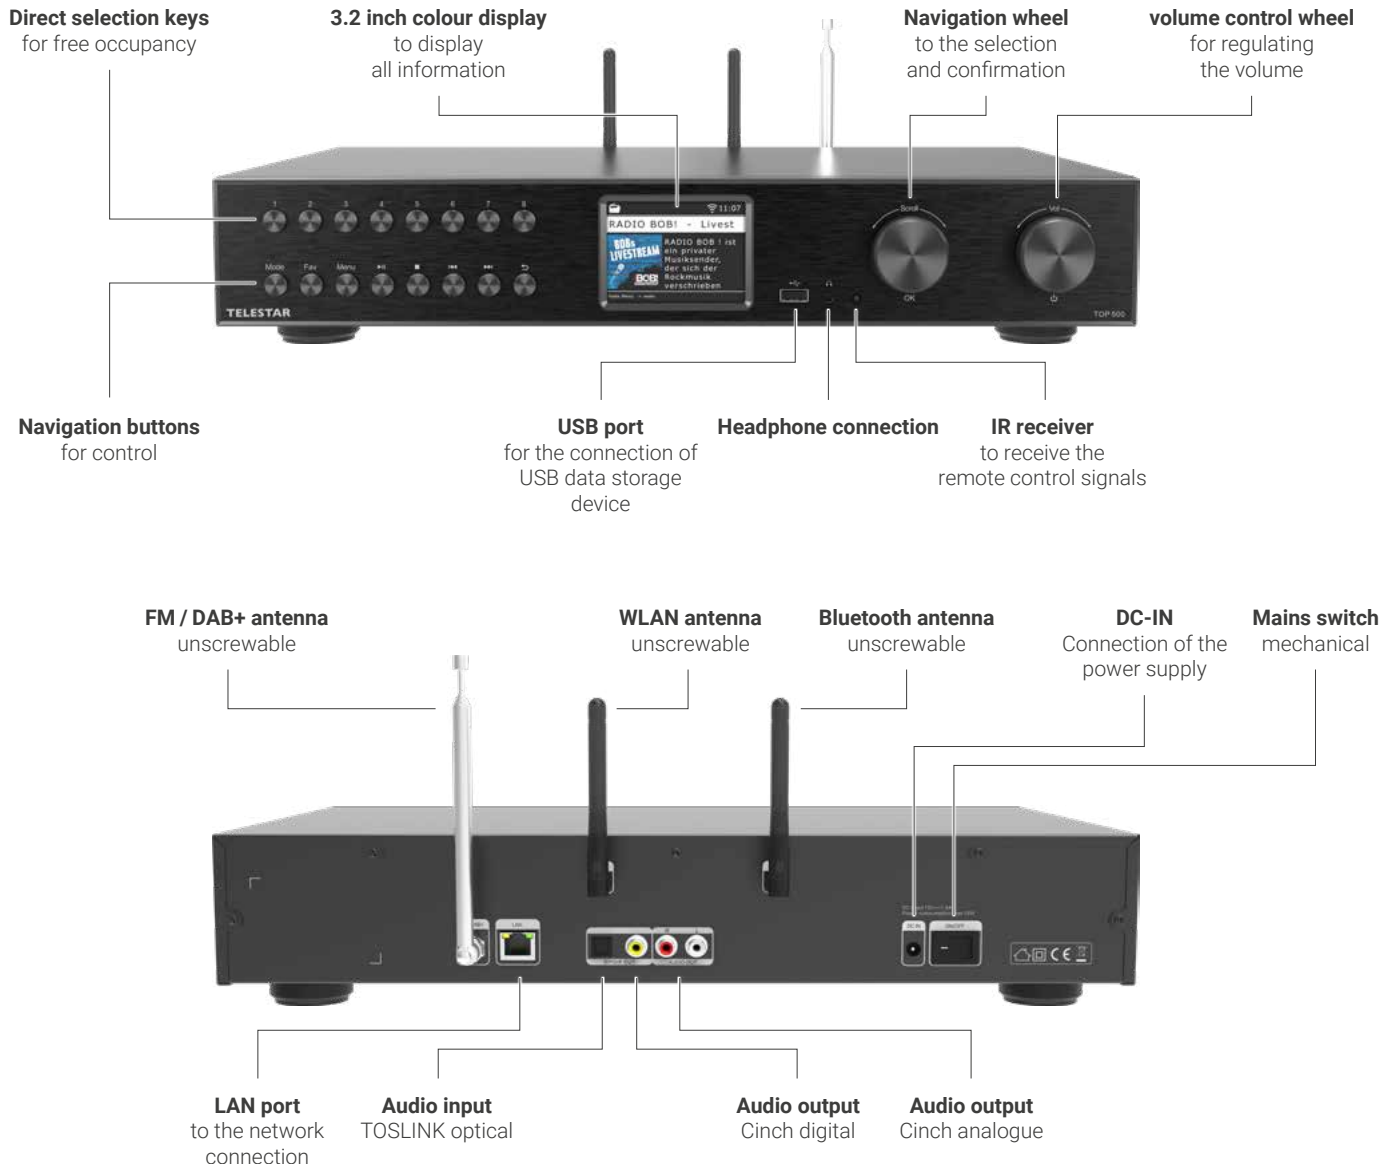

The high-quality hi-fi tuner enables reception of DAB+ and FM stations and adds modern functions to existing hi-fi systems. In addition to digital and analogue radio, the device offers versatile music sources: Bluetooth 5.3, USB playback and UPnP support enable flexible and wireless streaming. The integrated Bluetooth transmit and receive function allows both the connection of external devices and transmission to wireless speakers or headphones. With the practical recording function, radio programmes or music can be recorded directly to a USB memory device.

- **HiFi tuner with DAB+/UKW & Internet radio in HiFi rack width of 43 cm**
- **8.13 cm (3.2") TFT LCD colour display**
- **Music playback via Bluetooth® 5.3, USB and UPnP**
- **Integrated streaming services**
- **Bluetooth® transmit and receive function**
- **Recording function on USB memory**

The elegant metal housing in the standard 43 cm size fits perfectly into any hi-fi rack and blends harmoniously into existing stereo systems.

#### Performance features

HiFi tuner with DAB+/UKW & Internet radio in 43 cm HiFi rack width

Music playback via Bluetooth 5.3, USB and UPnP

Simple and intuitive operation with multilingual menu navigation
